FIX GLOBAL NFT

Good afternoon, friends! We want to present you our new project - Fix Global. This project is related to NFT and the NFT market. The main part of the project is ready, changes are possible in the future, but these will be minor details.

So, to begin with, let's figure out what NFT is.

NFT is an abbreviation, translated from English as non-fungible token - a non-interchangeable token, also a unique token is a type of cryptographic tokens, each instance of which is unique (specific) and cannot be exchanged or replaced by another similar token, although tokens are usually interchangeable by nature.

A non-interchangeable token is a cryptographic certificate of a digital object with the ability to transfer the certificate through a mechanism used in cryptocurrencies. The token itself is not a confirmation of the right to own a digital asset in the context of copyright law.

NFT does not prevent copying of the object, it only assigns to the owner a "digital chip" created on the basis of one of the copies of the digital artifact. There are also no obstacles to the formation of several different tokens for the same file. But if the participants agree that only the real owner can form the NFT and the further transfer of the NFT occurs only in connection with the transfer of the corresponding rights to the original digital object, then the NFT can act as a marker indicating the current owner of the object.

This sphere is also popular among world celebrities. Performers put NFT on their albums, artists on their paintings, and even famous football players are interested in the NFT market, for example, Ronaldo signed a contract with Binance, and Neymar put the famous monkey on the profile.

Our FIX GLOBAL project will be a global project that will be heard about in different countries of the world, thanks to Fix Global, we can move differently in terms of marketing and PR. We have created 2 unique collections: Fix Gold and Fix Diamond. More on this below Fix Gold and Fix Diamond will also be real, physical coins made of pure gold and real diamonds.

The NFT market has appeared quite recently, but it already has excellent forecasts. The same way once the cryptocurrency market, which did not gain much confidence from the majority, broke through to the level of trillions of dollars in turnover, this is also predicted for NFT. The NFT market and the cryptocurrency market are a bit down at the moment, but this is actually in our favor, because further growth is expected and many experts predict that by 2027, the turnover of the NFT market will be about \$ 13 billion, and we believe that these are quite realistic forecasts.

We didn't want to miss such a wonderful opportunity, so we decided to capture this market. Our intention is not to make 100 projects and then to not be able to keep up with each one, but since this project is related to cryptocurrency, we simply could not pass by. We have a very interesting and unique idea that we want to share and tell you about in more detail. Soon we will be launching all this and, of course, there will be a pre-launch period before launching on the OpenSea exchange.

Each NFT picture is unique and today it can cost \$100,000. and tomorrow is 10, but we offer you the opportunity not only to return your investments in the future and get a lot of bonuses, but also to have passive income in the future, as well as to earn on the growth of NFT itself. If you want to study and understand everything in more detail, then our academy will have a separate module on NFT and the NFT market.

THE THIRD ROUND OF THE "PUBLIC ROUND" WILL ALSO BE ASSOCIATED WITH THE LAUNCH DATE OF NFT ON OPENSEA 07.12.2022

In this round, 110 NFT will already be put up for sale at \$2000/\$10000. It will probably be much less in quantity. There will be fewer advantages in the Public Round than in the Seed and Private Rounds, but there will still be some advantages:

- Up to 5 NFT - 2 ticket to participate in the auction, where special numbers will be played to receive a physical coin. 6th NFT purchase gives 2 more auction tickets(Ticket price for all is \$ 100)

According to our plan to sell all available NFTs before the start of sales on OpenSea, since there will be 777 FIX Gold and 777 FIX Diamond in total, so everyone who wants, have time to buy it at the first two rounds of sales, as this will give you great advantages.

But we also provided privileges not only for the first buyers, but also for the second and third buyers, no one in the world has done this before so that even the second and third NFT buyers receive some privileges.

AUCTION FIX GLOBAL

Next, let's talk about the FIX Global Auction itself.

A ticket to this auction will cost \$ 100, the auction itself will be held on the official website, only those who have already purchased at least one NFT - FIX Gold or FIX Diamond will be able to participate.

The auction will feature several collections broken down by numbers.

The first three collections with numbers

FIX 1: 1, 2, 3, 4, 5, 6, 7, 8, 9

FIX 2: 11, 22, 33, 44, 55, 66, 77, 88, 99

FIX 3: 10, 20, 30, 40, 50, 60, 70, 80, 90, 100

These collections of numbers will be raffled off at auction from the start of the second round of Private - 07.08.2022 to 30.11.2022.

From the start of sales, their price will already be much higher than when buying. Starting from 07.12.2022, when we launch on OpenSea and launch Public sales round, the fourth collection will be played

FIX 4: 111, 222, 333, 444, 555, 666, 777

We are sure that there will be a person who wants to have a collection of all sevens or all sixes.

Because they can buy such a collection, for example, for \$15,000, and if they want to sell it later, they can do it for \$50,000. Because these are numbers, that will give you a physical coin. So If you win one of these numbers, then you will receive this coin physically

Characteristics of physical coins:

FIX Gold : 50g 18K gold

FIX Diamond : 100g 18K Gold + Diamonds

The only conclusion is that such a coin will be worth much more than the money you spent on it. And everyone will understand that this NFT is not just a picture on the blockchain, but also something valuable in their hands.

Speaking of prices, the numbers will start at the auction in this way:

Fix Gold:	Price	Fix Diamond:	Price
• 1, 11, 111	\$4.000;	• 1, 11, 111	\$17.111;
• 2, 22, 222	\$3.000;	• 2, 22, 222	\$15.000;
• 3, 33, 333	\$3.000;	• 3, 33, 333	\$15.000;
• 4, 44, 444	\$3.000;	• 4, 44, 444	\$15.000;
• 5, 55, 555	\$3.500;	• 5, 55, 555	\$16.000;
• 6, 66, 666	\$3.000;	• 6, 66, 666	\$15.000;
• 7, 77, 777	\$4.000;	• 7, 77, 777	\$17.000;
• 8, 88	\$3.500;	• 8, 88	\$16.000;
• 9,99	\$3.000;	• 9,99	\$15.000;
• 10, 20, 30, 40, 50, 60, 70, 80, 90	\$3.500;	• 10, 20, 30, 40, 50, 60, 70, 80, 90	\$16.000;
• 100, 200, 300, 400, 500, 600, 700	\$3.500.	• 100, 200, 300, 400, 500, 600, 700	\$16.000.

All other numbers, except collectible, will be sold at \$2000/\$10000 depending on your NFT.

TOKENOMICS NFT

Now I would like to tell you about TOKENOMICS.
Here the situation is as follows

- 85% (660 NFT) - Community. It will all go for sale.
- 5% (39 NFT) are founders who have 9 NFT in staking going to 12 months and 30 NFT go for 24 months.
- 5% (39 NFT) are advancers who have 9 NFT in staking going to 12 months and 30 NFT go for 24 months.
- 5% (39 NFT) is IT and marketing, which also have 9 in staking go for 12 months and 30 go for 24 months.

DISTRIBUTE FROM SALES

They will not be able to use these NFTs in order not to influence the market in any way after the start of sales. We will distribute the amount from sales as follows:

- 15% goes to the investor's account in ProfiXone
- 35% goes to staking, which provides 15%-25% per year (we do this in financial markets according to our unique system in ProfiXone);
- 20% will go to the affiliate program (this program is temporary for 3.5- 4 months so that you have the opportunity to earn extra money, then this program will not be);
- 15% to the founders;
- 5% advisers;
- 10% on expenses, IT, marketing and VIP Tickets.

SECURING STAKING

So that you immediately understand where the staking is coming from and do not wonder how it will be and from where. That in addition to all the privileges, you will also receive additional earnings from staking. It's very simple. 35% - which go into staking (indicated above), we need to provide 15%-25% per year to an investor who purchased, for example, Fix

Diamond, then he should receive \$1,500 per year, In any case, we need to make this 15% per year. Then the following happens, 35% of \$10,000 is \$3,500. We take this \$3,500 and send it to trading for 12 months in ProfiXone. Our task is to make 43% of that amount in 12 months. If we make 43% of \$3,500, which is \$1,505, then we have secured this staking.

AFFILIATE PROGRAM

Another interesting feature is the affiliate program. On the one hand, this is a very profitable affiliate program, and on the other, as mentioned above, this is a temporary program. We have specifically allocated 20% of sales to enable people to be more motivated and motivate their team.

The first bonus is a Personal Invite, it will have three levels:

- Level 1 7% of sales. You need to have a minimum of 1 NFT - \$2,000. When you reach \$100,000 sales turnover, then the percentage will rise to 8.
- 2 level 5% of sales. But to do this, you need to have a minimum of 2 NFT - \$4,000 or a turnover of \$20,000 in two levels.
- Level 3 3% of sales. Here you should already have 4 NFT - \$8,000/1 NFT for \$10,000 or make a sales turnover of \$60,000 in all three levels. The percentages for all levels are summed up.

The second bonus is the Matching Bonus. If we explain it in simpler language, then this is income from income. This bonus is included from the second level:

- Level 2 - 10% of the partner's income;
- Level 3 - 10% of the partner's income;
- Level 4 - 7% of the partner's income;

To open these levels, you need to have \$25,000 in your account or a sales turnover of \$100,000 in 3 levels.

- Level 5 - 5% of the partner's income;
- Level 6 - 3% of the partner's income;
- Level 7 - 2% of the partner's income;

In order for these levels to open, you need to have \$50,000 in your account or a sales turnover of \$300,000 in 3 levels. These percentages are also summed up, so if you open all 7 levels, then you will already get a solid percentage.

We think that these two bonuses will motivate you and your partners enough to achieve your goals. Perhaps later we will add some more bonus for reaching a certain level, or a monetary reward. In this amount, 20% goes to marketing, which will last a maximum of 4 months. To participate in this program, it is enough to give consent in your FIX Global account and send your NFT to staking for 12 months.

We hope you enjoyed our project. Everything is going according to plan, and we have even exceeded some of our projections.

THANK YOU
FOR WATCHING!
